

Indian Capstone Simulations

Developed by practitioners with mission to build corporate work skills

The most comprehensive “real time” skills certification and assessment solution for business and finance subjects

Indian Capstone Simulations is happy to introduce a new way to learn business and finance skills - "by doing". We feel text books, videos and online material tend to be passive ways of learning. It is only when we practice (or test) with real data in an interactive environment, we understand. Use cases:

Segment	Key challenge	How we solve
Corporates	How to recruit and train quality employees?	Real time data enabled projects are better than MCQs for testing. Self-assessment features reduce the need for supervision.
Colleges	How to provide practical projects that will demonstrate industry readiness?	Access to corporate practitioner-built simulations. Automated assessment. Acceptability by Corporates.
Candidates	How to build relevant work experience?	Simulations that find acceptance with employers. Candidate's online score sheets maintains a track record of performance.

Unique Features

MS Excel based models

Real time data and Indian situations

Anti-copying features

Technology enabled & easy online access

Self-scoring simulations

Gives pointers for self learning

Online solving support

Standardized testing for group assessment

Numerous subjects and Certifications
